This message is being viewed in an archive.

Hi, Ken:

We are looking to sample the following wells:

- 4916 and 4916A, which may also be CALMAT 3 and 2, near Bradley and Gregg Pit/Benz Dump
- 4909F. 4909C and 4899, all of which are on Hewitt Pit.

Please let me know if my understanding is incorrect, and your client does not own these wells. If so, and you know who does, would you please let me know who?

Thanks.

Regards,
Kelly Manheimer
EPA, Superfund SFD-7-1

Hi, Ken:

From my email of 11/16:

In order for us to accomplish this work on the expedited timeline we need, I am requesting the following support from you:

- We would like to make sure that our drilling subcontractor has complete access the monitor well(s). **If anything needs to be moved you should move it before we arrive.**
- We would like to know if you have observed any difficulties when sampling any of your monitoring wells recently (if you have sampled any), or if you have observed any conditions that may make it difficult for us to sample.
- Sampling would likely be during the weeks of 6 December and/or 13 December.
- We will contact you approximately 3 days prior to anticipated field date for confirmation. EPA's contractor is CH2MHILL.
- If you would like split samples, you should have your consultant there to collect them.
- We will use a portable pump and collect the purge water for transportation and disposal off of your site.

Basically, the request is for access to sample the wells, and that you ensure the wells are available to be sampled. I had originally sent out the list of wells that we would like to sample. Please let me know if you need me to re-send, and highlight the wells that we believe are owned by Vulcan/CalMat.

Thanks!

Hello:

If you are receiving this email, it is because you have been identified as being a current property owner, or represent a current property owner, who has received special notice for the San Fernando Valley (Area 1) Superfund site, North Hollywood Operable Unit. I sent out an email on October 26, 2010 (text below) which requested that you participate in a sampling event that we are coordinating for the first 2 weeks of December. As of the time of this email, I have not yet received a response from you.

The purpose of this email, therefore, is to let you know that EPA will be conducting the sampling on your property during the beginning of December, of the wells identified in my previous email, and we will be following up with a bill to you for that effort. In order for us to accomplish this work on the expedited timeline we need, I am requesting the following support from you:

- We would like to make sure that our drilling subcontractor has complete access the monitor well(s). If anything needs to be moved you should move it before we arrive.
- We would like to know if you have observed any difficulties when sampling any of your monitoring wells recently (if you have sampled any), or if you have observed any conditions that may make it difficult for us to sample.
- Sampling would likely be during the weeks of 6 December and/or 13 December.
- We will contact you approximately 3 days prior to anticipated field date for confirmation. EPA's contractor is CH2MHILL.
- If you would like split samples, you should have your consultant there to collect them.
- We will use a portable pump and collect the purge water for transportation and disposal off of your site.

I will be calling you in the next couple of days to confirm receipt of this email, and to confirm your acceptance of the requests that I have made above. Please feel free to call me in advance, if you wish, or if you have any questions.

Regards,
Kelly Manheimer

Hello all:

As I was putting together the SAP/QAPP documents, I realized that it would be easier (and save time/resources/money/etc) to simply load all the documents onto an ftp site, and let you download them as you wish.

So, all the pertinent plans are loaded here:

ftp://ftp.ch2m.com/SFVpublic/SFV_Basinwide/SAP_QAPP_Docs

Username = **anyuser2**

Password = **fernando**

The updated matrix of wells to be sampled is attached to this email. In addition, the

final letter requesting your participation is also attached (I will not be sending out a hard copy letter).

Please let me know if you have any questions. Thank you, in advance, for your support of this very important task.

Regards,

Kelly Manheimer

Hello:

Attached please find a draft letter, requesting a basin-wide sampling event to be conducted the first 2 weeks of December. I will be sending out a hard-copy of the letter, with the attachments, early next week, but I did not want to delay your receipt of this, since time is short. I will not be sending the letter to everyone, but only the primary contact at each facility.

I have attached a preliminary list of the wells to be sampled as well. This is subject to minor changes, but will be finalized for the hard copy letter next week.

Please let me know if you have any questions.

Take care, and have a good weekend.

Thanks, Ken. I appreciate the information, and the clarification.

I understand that wells 4916 and 4916A are production wells owned by Vulcan. We still need to sample them. Are you denying us access, or will you provide access to those wells? The ULARA Watermaster has requested that we obtain water level measurements from every well that we can in the SFV. If you did not receive the email from the Watermaster, please let me know. He requested that each production well be turned off for a period of 24 hours or so prior to the water level measurement. We could cycle these, sampling one well one day, and the other in a few days, in order to minimize the impact to ongoing activities.

I also understand that well 4899 is a Vulcan well, but not on Vulcan property. Since the well is owned by Vulcan, will you provide access? I understand that I still need to get property access from the property owner, who I believe is the City of LA - do you know if that is correct?

I also understand that well 4909C is owned by LADWP, but on Vulcan property. I can get the well access from LADWP - will you provide property access, and ensure that the well is accessible (as in my email request below)?

You neglected to mention well 4909F, but I assume it is the same as 4909C, so the same questions would apply.

Thank you for your prompt attention to these questions.

Another bit of follow up information, I understand that Well 4899 is not on Vulcan property, but is a Vulcan well. Access to the well is controlled by a third-party. Thanks.

Hi, Ken:
We are looking to sample the following wells:

- 4916 and 4916A, which may also be CALMAT 3 and 2, near Bradley and Gregg Pit/Benz Dump
- 4909F, 4909C and 4899, all of which are on Hewitt Pit.

Please let me know if my understanding is incorrect, and your client does not own these wells. If so, and you know who does, would you please let me know who?

Thanks.

Hi, Ken:
From my email of 11/16:

In order for us to accomplish this work on the expedited timeline we need, I am requesting the following support from you:

- We would like to make sure that our drilling subcontractor has complete access the monitor well(s). **If anything needs to be moved you should move it before we arrive.**
- We would like to know if you have observed any difficulties when sampling any of your monitoring wells recently (if you have sampled any), or if you have observed any conditions that may make it difficult for us to sample.
- Sampling would likely be during the weeks of 6 December and/or 13 December.
- We will contact you approximately 3 days prior to anticipated field date for confirmation. EPA's contractor is CH2MHILL.
- If you would like split samples, you should have your consultant there to collect them.
- We will use a portable pump and collect the purge water for transportation and disposal off of your site.

Basically, the request is for access to sample the wells, and that you ensure the wells are available to be sampled. I had originally sent out the list of wells that we would like to sample. Please let me know if you need me to re-send, and highlight the wells that we believe are owned by Vulcan/CalMat.

Thanks!

Regards,
Kelly Manheimer

Subject: Re: Basin-wide sampling event request

Hello:

If you are receiving this email, it is because you have been identified as being a current property owner, or represent a current property owner, who has received special notice for the San Fernando Valley (Area 1) Superfund site, North Hollywood Operable Unit. I sent out an email on October 26, 2010 (text below) which requested that you participate in a sampling event that we are coordinating for the first 2 weeks of December. As of the time of this email, I have not yet received a response from you.

The purpose of this email, therefore, is to let you know that EPA will be conducting the sampling on your property during the beginning of December, of the wells identified in my previous email, and we will be following up with a bill to you for that effort. In order for us to accomplish this work on the expedited timeline we need, I am requesting the following support from you:

- We would like to make sure that our drilling subcontractor has complete access the monitor well(s). If anything needs to be moved you should move it before we arrive.
- We would like to know if you have observed any difficulties when sampling any of your monitoring wells recently (if you have sampled any), or if you have observed any conditions that may make it difficult for us to sample.
- Sampling would likely be during the weeks of 6 December and/or 13 December.
- We will contact you approximately 3 days prior to anticipated field date for confirmation. EPA's contractor is CH2MHILL.
- If you would like split samples, you should have your consultant there to collect them.
- We will use a portable pump and collect the purge water for transportation and disposal off of your site.

I will be calling you in the next couple of days to confirm receipt of this email, and to confirm your acceptance of the requests that I have made above. Please feel free to call me in advance, if you wish, or if you have any questions.

Regards,
Kelly Manheimer

Hello all:

As I was putting together the SAP/QAPP documents, I realized that it would be easier (and save time/resources/money/etc) to simply load all the documents onto an ftp site, and let you download them as you wish.

So, all the pertinent plans are loaded here:

ftp://ftp.ch2m.com/SFVpublic/SFV_Basinwide/SAP_QAPP_Docs

Username = **anyuser2**

Password = **fernando**

The updated matrix of wells to be sampled is attached to this email. In addition, the final letter requesting your participation is also attached (I will not be sending out a hard copy letter).

Please let me know if you have any questions. Thank you, in advance, for your support of this very important task.

Regards,

Kelly Manheimer

Subj: Basin-wide sampling event request

ect:

Hello:

Attached please find a draft letter, requesting a basin-wide sampling event to be conducted the first 2 weeks of December. I will be sending out a hard-copy of the letter, with the attachments, early next week, but I did not want to delay your receipt of this, since time is short. I will not be sending the letter to everyone, but only the primary contact at each facility.

I have attached a preliminary list of the wells to be sampled as well. This is subject to minor changes, but will be finalized for the hard copy letter next week.

Please let me know if you have any questions.

Take care, and have a good weekend.

Hi, Ken:

As you probably noticed from my out of office response, I am on vacation until Jan 4. I have asked John Lindquist, my consultant at CH2MHILL who was coordinating the sampling event, to get back to you, if he can. If not, I will check into it, and get back to you early next week when I return.

Take care, and have a Happy New Year.

Regards,

Kelly Manheimer

Kelly et al-

When we spoke after your 12/2/10 email below, I referred you to Brian Anderson at Vulcan to coordinate. To date, Brian has not received any call or email from EPA. We need to coordinate this sampling to ensure proper access and controls. When does EPA plan to conduct this sampling?

In addition to contacting Mr.. Anderson, please also coordinate with Charles St. John at Vulcan. Mr. St. John's contact info is below:

Date: 11/23/2010 01:07 PM
Subject: Re: Basin-wide sampling event request

Thanks, Ken. I appreciate the information, and the clarification.

I understand that wells 4916 and 4916A are production wells owned by Vulcan. We still need to sample them. Are you denying us access, or will you provide access to those wells? The ULARA Watermaster has requested that we obtain water level measurements from every well that we can in the SFV. If you did not receive the email from the Watermaster, please let me know. He requested that each production well be turned off for a period of 24 hours or so prior to the water level measurement. We could cycle these, sampling one well one day, and the other in a few days, in order to minimize the impact to ongoing activities.

I also understand that well 4899 is a Vulcan well, but not on Vulcan property. Since the well is owned by Vulcan, will you provide access? I understand that I still need to get property access from the property owner, who I believe is the City of LA - do you know if that is correct?

I also understand that well 4909C is owned by LADWP, but on Vulcan property. I can get the well access from LADWP - will you provide property access, and ensure that the well is accessible (as in my email request below)?

You neglected to mention well 4909F, but I assume it is the same as 4909C, so the same questions would apply.

Thank you for your prompt attention to these questions.

Subject: Re: Basin-wide sampling event request

Hi, Ken:

From my email of 11/16:

In order for us to accomplish this work on the expedited timeline we need, I am requesting the following support from you:

- We would like to make sure that our drilling subcontractor has complete access the monitor well(s). **If anything needs to be moved you should move it before we arrive.**
- We would like to know if you have observed any difficulties when sampling any of your monitoring wells recently (if you have sampled any), or if you have observed any conditions that may make it difficult for us to sample.
- Sampling would likely be during the weeks of 6 December and/or 13 December.
- We will contact you approximately 3 days prior to anticipated field date for confirmation. EPA's contractor is CH2MHILL.
- If you would like split samples, you should have your consultant there to collect them.
- We will use a portable pump and collect the purge water for transportation and disposal off of your site.

Basically, the request is for access to sample the wells, and that you ensure the wells are available to be sampled. I had originally sent out the list of wells that we would like to sample. Please let me know if you need me to re-send, and highlight the wells that we believe are owned by Vulcan/CalMat.

Thanks!

Regards,
Kelly Manheimer

Subject: Re: Basin-wide sampling event request

Hello:

If you are receiving this email, it is because you have been identified as being a current property owner, or represent a current property owner, who has received special notice for the San Fernando Valley (Area 1) Superfund site, North Hollywood Operable Unit. I sent out an email on October 26, 2010 (text below) which requested that you participate in a sampling event that we are coordinating for the first 2 weeks of December. As of the time of this email, I have not yet received a response from you.

The purpose of this email, therefore, is to let you know that EPA will be conducting the sampling on your property during the beginning of December, of the wells identified in my previous email, and we will be following up with a bill to you for that effort. In order for us to accomplish this work on the expedited timeline we need, I am requesting the following support from you:

- We would like to make sure that our drilling subcontractor has complete access the monitor well(s). If anything needs to be moved you should move it before we arrive.
- We would like to know if you have observed any difficulties when sampling any of your monitoring wells recently (if you have sampled any), or if you have observed any conditions that may make it difficult for us to sample.
- Sampling would likely be during the weeks of 6 December and/or 13 December.
- We will contact you approximately 3 days prior to anticipated field date for confirmation. EPA's contractor is CH2MHILL.
- If you would like split samples, you should have your consultant there to collect them.
- We will use a portable pump and collect the purge water for transportation and disposal off of your site.

I will be calling you in the next couple of days to confirm receipt of this email, and to confirm your acceptance of the requests that I have made above. Please feel free to call me in advance, if you wish,

or if you have any questions.

Regards,
Kelly Manheimer

Subject: Re: Basin-wide sampling event request

Hello all:

As I was putting together the SAP/QAPP documents, I realized that it would be easier (and save time/resources/money/etc) to simply load all the documents onto an ftp site, and let you download them as you wish.

So, all the pertinent plans are loaded here:

ftp://ftp.ch2m.com/SFVpublic/SFV_Basinwide/SAP_QAPP_Docs

Username = **anyuser2**

Password = **fernando**

The updated matrix of wells to be sampled is attached to this email. In addition, the final letter requesting your participation is also attached (I will not be sending out a hard copy letter).

Please let me know if you have any questions. Thank you, in advance, for your support of this very important task.

Regards,
Kelly Manheimer

Subj Basin-wide sampling event request

ect:

Hello:

Attached please find a draft letter, requesting a basin-wide sampling event to be conducted the first 2 weeks of December. I will be sending out a hard-copy of the letter, with the attachments, early next week, but I did not want to delay your receipt of this, since time is short. I will not be sending the letter to everyone, but only the primary contact at each facility.

I have attached a preliminary list of the wells to be sampled as well. This is subject to minor changes, but will be finalized for the hard copy letter next week.

Please let me know if you have any questions.

Take care, and have a good weekend.

Regards,

Kelly Manheimer

Hi, Ken:

Due to the delays we have encountered, both in weather and obtaining your access approval, I have decided to postpone the sampling event of your wells until our next regional event which will be in April. This is to ensure our data is comparable to the other data, as well as to maximize efficiency. I assume that the process we have worked out to gain access to the wells will still apply, so we will follow those when we are planning for it, which will likely be in March.

Please let me know if you have any questions.

Take care, and Happy New Year.

Regards,
Kelly Manheimer

Subject: RE: Basin-wide sampling event request

Dear Mr. Ehrlich;

My apologies for not providing you, Mr. Anderson, and Mr. St. John with an update regarding the sampling plans. To keep this effort as cost-effective as possible, we are trying to coordinate the sampling efforts such that two to three facilities can be sampled during each mobilization of the sampling team. Due to the initial questions about which Vulcan wells would be sampled, if any, we planned to sample them as part of a follow-on mobilization later in December (together with wells at another facility in North Hollywood that were not able to be sampled during our early December mobilization).

Unfortunately, due to the sampling team's schedule and severe weather in Los Angeles during the week before and after Christmas, we have not yet been able to schedule the follow-up mobilization of the sampling team to the remaining facilities, including Vulcan's. We plan to contact Mr. Anderson, Mr. St. John, and the representative for the other unsampled facility next week to arrange a sampling date that works for all parties.

Either myself or the sample team leader, Andy Austin, will contact Mr. Anderson and Mr. St. John next week to arrange a date in early January for sampling the Vulcan wells. Thank you for your assistance.

Regards,

John Lindquist

[Kelly et al-](#)

When we spoke after your 12/2/10 email below, I referred you to Brian Anderson at Vulcan to coordinate. To date, Brian has not received any call or email from EPA. We need to coordinate this sampling to ensure proper access and controls. When does EPA plan to conduct this sampling?

In addition to contacting Mr.. Anderson, please also coordinate with Charles St. John at Vulcan. Mr. St. John's contact info is below:

Subject: Re: Basin-wide sampling event request

Thanks, Ken. I appreciate the information, and the clarification.

I understand that wells 4916 and 4916A are production wells owned by Vulcan. We still need to sample them. Are you denying us access, or will you provide access to those wells? The ULARA Watermaster has requested that we obtain water level measurements from every well that we can in the SFV. If you did not receive the email from the Watermaster, please let me know. He requested that each production well be turned off for a period of 24 hours or so prior to the water level measurement. We could cycle these, sampling one well one day, and the other in a few days, in order to minimize the impact to ongoing activities.

I also understand that well 4899 is a Vulcan well, but not on Vulcan property. Since the well is owned by Vulcan, will you provide access? I understand that I still need to get property access from the property owner, who I believe is the City of LA - do you know if that is correct?

I also understand that well 4909C is owned by LADWP, but on Vulcan property. I can get the well access from LADWP - will you provide property access, and ensure that the well is accessible (as in my email request below)?

You neglected to mention well 4909F, but I assume it is the same as 4909C, so the same questions would apply.

Thank you for your prompt attention to these questions.

Subject: Re: Basin-wide sampling event request

Hi, Ken:

From my email of 11/16:

In order for us to accomplish this work on the expedited timeline we need, I am requesting the following support from you:

- We would like to make sure that our drilling subcontractor has complete access the monitor well(s). **If anything needs to be moved you should move it before we arrive.**
- We would like to know if you have observed any difficulties when sampling any of your monitoring wells recently (if you have sampled any), or if you have observed any conditions that may make it difficult for us to sample.
- Sampling would likely be during the weeks of 6 December and/or 13 December.
- We will contact you approximately 3 days prior to anticipated field date for confirmation. EPA's contractor is CH2MHILL.
- If you would like split samples, you should have your consultant there to collect them.
- We will use a portable pump and collect the purge water for transportation and disposal off of your site.

Basically, the request is for access to sample the wells, and that you ensure the wells are available to be sampled. I had originally sent out the list of wells that we would like to sample. Please let me know if you need me to re-send, and highlight the wells that we believe are owned by Vulcan/CalMat.

Thanks!

Regards,
Kelly Manheimer

Hello:

If you are receiving this email, it is because you have been identified as being a current property owner, or represent a current property owner, who has received special notice for the San Fernando Valley (Area 1) Superfund site, North Hollywood Operable Unit. I sent out an email on October 26, 2010 (text below)

which requested that you participate in a sampling event that we are coordinating for the first 2 weeks of December. As of the time of this email, I have not yet received a response from you.

The purpose of this email, therefore, is to let you know that EPA will be conducting the sampling on your property during the beginning of December, of the wells identified in my previous email, and we will be following up with a bill to you for that effort. In order for us to accomplish this work on the expedited timeline we need, I am requesting the following support from you:

- We would like to make sure that our drilling subcontractor has complete access the monitor well(s). If anything needs to be moved you should move it before we arrive.
- We would like to know if you have observed any difficulties when sampling any of your monitoring wells recently (if you have sampled any), or if you have observed any conditions that may make it difficult for us to sample.
- Sampling would likely be during the weeks of 6 December and/or 13 December.
- We will contact you approximately 3 days prior to anticipated field date for confirmation. EPA's contractor is CH2MHILL.
- If you would like split samples, you should have your consultant there to collect them.
- We will use a portable pump and collect the purge water for transportation and disposal off of your site.

I will be calling you in the next couple of days to confirm receipt of this email, and to confirm your acceptance of the requests that I have made above. Please feel free to call me in advance, if you wish, or if you have any questions.

Regards,
Kelly Manheimer

Hello all:

As I was putting together the SAP/QAPP documents, I realized that it would be easier (and save time/resources/money/etc) to simply load all the documents onto an ftp site, and let you download them as you wish.

So, all the pertinent plans are loaded here:

ftp://ftp.ch2m.com/SFVpublic/SFV_Basinwide/SAP_QAPP_Docs

Username = **anyuser2**

Password = **fernando**

The updated matrix of wells to be sampled is attached to this email. In addition, the final letter requesting your participation is also attached (I will not be sending out a hard copy letter).

Please let me know if you have any questions. Thank you, in advance, for your support of this very important task.

Regards,
Kelly Manheimer

Hello:

Attached please find a draft letter, requesting a basin-wide sampling event to be conducted the first 2 weeks of December. I will be sending out a hard-copy of the letter, with the attachments, early next week, but I did not want to delay your receipt of this, since time is short. I will not be sending the letter to everyone, but only the primary contact at each facility.

I have attached a preliminary list of the wells to be sampled as well. This is subject to minor changes, but will be finalized for the hard copy letter next week.

Please let me know if you have any questions.

Take care, and have a good weekend.

Hi, Ken:

Hopefully, the last change. We would like to split the sampling of your wells into 2 events: perform the analytical sampling of the Hewitt wells within the next couple of weeks, then do the analytical of the CalMat wells, as well as the water level of all the wells, in April with the larger sampling event.

Would you please let me know if you have any problems with this request?

Thanks, and have a good one!

Subject: RE: Basin-wide sampling event request

Hi, Ken:

Due to the delays we have encountered, both in weather and obtaining your access approval, I have decided to postpone the sampling event of your wells until our next regional event which will be in April. This is to ensure our data is comparable to the other data, as well as to maximize efficiency. I assume that the process we have worked out to gain access to the wells will still apply, so we will follow those when we are planning for it, which will likely be in March.

Please let me know if you have any questions.

Take care, and Happy New Year.

Subject: Re: Basin-wide sampling event request

Thanks, Ken. I appreciate the information, and the clarification.

I understand that wells 4916 and 4916A are production wells owned by Vulcan. We still need to sample them. Are you denying us access, or will you provide access to those wells? The ULARA Watermaster has requested that we obtain water level measurements from every well that we can in the SFV. If you did not receive the email from the Watermaster, please let me know. He requested that each production well be turned off for a period of 24 hours or so prior to the water level measurement. We could cycle these, sampling one well one day, and the other in a few days, in order to minimize the impact to ongoing activities.

I also understand that well 4899 is a Vulcan well, but not on Vulcan property. Since the well is owned by Vulcan, will you provide access? I understand that I still need to get property access from the property owner, who I believe is the City of LA - do you know if that is correct?

I also understand that well 4909C is owned by LADWP, but on Vulcan property. I can get the well access from LADWP - will you provide property access, and ensure that the well is accessible (as in my email request below)?

You neglected to mention well 4909F, but I assume it is the same as 4909C, so the same questions would apply.

Thank you for your prompt attention to these questions.

Regards,
Kelly Manheimer

Subject: Re: Basin-wide sampling event request

Hello:

If you are receiving this email, it is because you have been identified as being a current property owner, or represent a current property owner, who has received special notice for the San Fernando Valley (Area 1) Superfund site, North Hollywood Operable Unit. I sent out an email on October 26, 2010 (text below) which requested that you participate in a sampling event that we are coordinating for the first 2 weeks of December. As of the time of this email, I have not yet received a response from you.

The purpose of this email, therefore, is to let you know that EPA will be conducting the sampling on your property during the beginning of December, of the wells identified in my previous email, and we will be following up with a bill to you for that effort. In order for us to accomplish this work on the expedited timeline we need, I am requesting the following support from you:

- We would like to make sure that our drilling subcontractor has complete access the monitor well(s). If anything needs to be moved you should move it before we arrive.
- We would like to know if you have observed any difficulties when sampling any of your monitoring wells recently (if you have sampled any), or if you have observed any conditions that may make it difficult for us to sample.
- Sampling would likely be during the weeks of 6 December and/or 13 December.
- We will contact you approximately 3 days prior to anticipated field date for confirmation. EPA's contractor is CH2MHILL.
- If you would like split samples, you should have your consultant there to collect them.
- We will use a portable pump and collect the purge water for transportation and disposal off of your site.

I will be calling you in the next couple of days to confirm receipt of this email, and to confirm your acceptance of the requests that I have made above. Please feel free to call me in advance, if you wish, or if you have any questions.

Regards,
Kelly Manheimer

Hello all:

As I was putting together the SAP/QAPP documents, I realized that it would be easier (and save time/resources/money/etc) to simply load all the documents onto an ftp site, and let you download them as you wish.

So, all the pertinent plans are loaded here:

ftp://ftp.ch2m.com/SFVpublic/SFV_Basinwide/SAP_QAPP_Docs

Username = **anyuser2**

Password = **fernando**

The updated matrix of wells to be sampled is attached to this email. In addition, the final letter requesting your participation is also attached (I will not be sending out a hard copy letter).

Please let me know if you have any questions. Thank you, in advance, for your support of this very important task.

Regards,
Kelly Manheimer

Su Basin-wide sampling event request

bje

ct:

Hello:

Attached please find a draft letter, requesting a basin-wide sampling event to be conducted the first 2 weeks of December. I will be sending out a hard-copy of the letter, with the attachments, early next week, but I did not want to delay your receipt of this, since time is short. I will not be sending the letter to everyone, but only the primary contact at each facility.

I have attached a preliminary list of the wells to be sampled as well. This is subject to minor changes, but will be finalized for the hard copy letter next week.

Please let me know if you have any questions.

Take care, and have a good weekend.

Regards,

Kelly Manheimer

Hi, Ken:

Actually, I think that Mike should have that conversation with you. He will be back in the office on Wednesday, will that be soon enough? If not, perhaps I can ask Marie Rongone to discuss it with you in his absence.

Marie/Mike: we are hoping to conduct the sampling late next week, Wednesday or Thursday, I believe.

Take care,

Hi, Ken:

Hopefully, the last change. We would like to split the sampling of your wells into 2 events: perform the analytical sampling of the Hewitt wells within the next couple of weeks, then do the analytical of the CalMat wells, as well as the water level of all the wells, in April with the larger sampling event.

Would you please let me know if you have any problems with this request?

Thanks, and have a good one!

:

Hi, Ken:

Due to the delays we have encountered, both in weather and obtaining your access approval, I have decided to postpone the sampling event of your wells until our next regional event which will be in April. This is to ensure our data is comparable to the other data, as well as to maximize efficiency. I assume that the process we have worked out to gain access to the wells will still apply, so we will follow those when we are planning for it, which will likely be in March.

Please let me know if you have any questions.

Take care, and Happy New Year.

Subject: RE: Basin-wide sampling event request

t:

Dear Mr. Ehrlich;

My apologies for not providing you, Mr. Anderson, and Mr. St. John with an update regarding the sampling plans. To keep this effort as cost-effective as possible, we are trying to coordinate the sampling efforts such that two to three facilities can be sampled during each mobilization of the sampling team. Due to the initial questions about which Vulcan wells would be sampled, if any, we planned to sample them as part of a follow-on mobilization later in December (together with wells at another facility in North Hollywood that were not able to be sampled during our early December mobilization).

Unfortunately, due to the sampling team's schedule and severe weather in Los Angeles during the week before and after Christmas, we have not yet been able to schedule the follow-up mobilization of the sampling team to the remaining facilities, including Vulcan's. We plan to contact Mr. Anderson, Mr. St. John, and the representative for the other unsampled facility next week to arrange a sampling date that works for all parties.

Either myself or the sample team leader, Andy Austin, will contact Mr. Anderson and Mr. St. John next week to arrange a date in early January for sampling the Vulcan wells. Thank you for your assistance.

Hi, Ken:

From my email of 11/16:

In order for us to accomplish this work on the expedited timeline we need, I am requesting the following support from you:

- We would like to make sure that our drilling subcontractor has complete access the monitor well(s). **If anything needs to be moved you should move it before we arrive.**
- We would like to know if you have observed any difficulties when sampling any of your monitoring wells recently (if you have sampled any), or if you have observed any conditions that may make it difficult for us to sample.
- Sampling would likely be during the weeks of 6 December and/or 13 December.
- We will contact you approximately 3 days prior to anticipated field date for confirmation. EPA's contractor is CH2MHILL.
- If you would like split samples, you should have your consultant there to collect them.
- We will use a portable pump and collect the purge water for transportation and disposal off of your site.

Basically, the request is for access to sample the wells, and that you ensure the wells are available to be sampled. I had originally sent out the list of wells that we would like to sample. Please let me know if you need me to re-send, and highlight the wells that we believe are owned by Vulcan/CalMat.

Thanks!

Hello all:

As I was putting together the SAP/QAPP documents, I realized that it would be easier (and save time/resources/money/etc) to simply load all the documents onto an ftp site, and let you download them as you wish.

So, all the pertinent plans are loaded here:

ftp://ftp.ch2m.com/SFVpublic/SFV_Basinwide/SAP_QAPP_Docs

Username = **anyuser2**

Password = **fernando**

The updated matrix of wells to be sampled is attached to this email. In addition, the

final letter requesting your participation is also attached (I will not be sending out a hard copy letter).

Please let me know if you have any questions. Thank you, in advance, for your support of this very important task.

Regards,

Kelly Manheimer

Subject: Basin-wide sampling event request

bje

ct:

Hello:

Attached please find a draft letter, requesting a basin-wide sampling event to be conducted the first 2 weeks of December. I will be sending out a hard-copy of the letter, with the attachments, early next week, but I did not want to delay your receipt of this, since time is short. I will not be sending the letter to everyone, but only the primary contact at each facility.

I have attached a preliminary list of the wells to be sampled as well. This is subject to minor changes, but will be finalized for the hard copy letter next week.

Please let me know if you have any questions.

Take care, and have a good weekend.

Regards,
Kelly Manheimer
